EXPERT PREPARATION & APPLICATION

CUSTOM PRODUCTS BUILT FOR YOUR NEEDS

TOPCOAT
Polyaspartic Polyurea

FLAKES
Blend of Choice

BASECOAT
Polyurea for Broadcast System

CONCRETE

STEP 1 PREPARATION

Preparation includes shot blasting and/or diamond grinding. Dust is minimized by having all grinders hooked up to vacuum systems.

STEP 4 BROADCASTING THE CHIP

Immediately after the basecoat application, the chip is generously broadcast by hand, providing both color and texture to the floor.

STEP 2 CONCRETE RECONSTRUCTION

Our award winning mentors and fillers are used to fix pits and cracks before the process begins.

STEP 5 SCRAPING THE CHIP

Once the basecoat is fully cured the floor is scraped and vacuumed to remove any loose or vertical standing flakes.

STEP 3 BASECOAT

100% solids, self-priming pure polyuria base coat is mixed and applied.

STEP 6 CLEAR COAT

The final step is to roll out the UV stable polyaspartic clear coat.

4X STRONGER THAN EPOXY!
